All of the forms in the "USG Walworth Calc" spreadsheet that contain facility production and coke usage data are marked "Company Confidential". So, we cannot share this with WDNR.

Yes, I'm referring to the spreadsheet. I assume that's the best (and easiest) compilation of available information. Let me know if you think there's some other set of information that Wisconsin would find useful. Thanks for checking.

John – I'll need to take a look at the file I sent you. Are you referring to my USG spreadsheet? If so, I'll need to verify there's no CBI issues.

Do we have constraints about what we can send to Wisconsin? If not. Is the file you sent me a good compilation of the information we have?

P.S. Welcome back!

John,

Last week when we discussed this, I asked for all of the data, assumptions, calculations, and modeling that went into this rationale. I believe you were checking on your ability to send us that. To fully understand your rationale and be able to react to it, we need to see that information. Please send at your earliest convenience.

Gail

Thank you for your input. Here is our current draft of a letter and an attachment addressing the sources listed under the SO2 data requirements rule, most notably addressing USG Interiors in Walworth.

I look forward to our discussion on Tuesday afternoon.
